

DENNIS SITNIC

Skills

- **Core & Compute:** Python, SQL, PySpark, Pandas, Polars, DuckDB
- **Cloud & Tools:** Microsoft Fabric, AWS, Azure, Git, Power BI, Airflow, Databricks
- **Languages:** German (Native), English (Proficient), MSA (A2)

Work Experience & Training

April 2026 – August 2026: Data Engineer Intensive Training (500+ Hours), AW Academy / Brights – Munich, GER

- Intensive full-time training program focusing on enterprise data engineering architectures.
- **Core Topics:** Cloud Data Platforms (Azure, Microsoft Fabric, Databricks), ETL/ELT pipeline orchestration, Dimensional Modeling, Advanced SQL and Python.
- Delivered three production-style data products utilizing Agile/Scrum and Git workflows.

February 2021 – June 2025: Capgemini Engineering (Client: BMW Group) – Munich, GER

Data Analytics and Engineering | August 2024 – June 2025

- Designed and implemented automated analysis pipelines to detect specific patterns in large-scale BMW vehicle car measurement data using Python, AWS and Traceanalysis.
- Developed interactive dashboards and collaborated closely with stakeholders to translate requirements into data-driven insights.

Workpackage Leader | October 2023 – June 2025

- Directed an international team of six within the BMW HiL-testing environment, managing resource capacity planning and holding responsibility for an annual mid-six-figure budget.
- Negotiated work package valuations and presented management reports directly to clients and senior leadership.

Technical Lead, Consultant | March 2022 – October 2023

- Provided subject-matter leadership and coaching to colleagues, and delivered technical training sessions.
- Won a Supplier Competition as a Python Specialist by completing a complex automotive task within 12 hours, securing a new contract for the company.

Test Engineer, Junior Consultant | February 2021 – March 2022

- Proactively developed a Python automation script to evaluate large volumes of measurement data, saving manual efforts equivalent to ~2 full-time positions (FTE).
- Developed and maintained automated tests using Python-based ECU-Test software and conducted Problem-Management.

Data Engineering Portfolio

Microsoft Fabric Lakehouse Pipeline | Microsoft Fabric, PySpark, Lakehouse | [Slides](#) | [GitHub Code](#)

- Developed an end-to-end Medallion architecture (Bronze/Silver/Gold) with automated incremental loading.
- Implemented Silver layer data quality validation and Gold layer Slowly Changing Dimensions (SCD Type 2).

Automated Flight & Weather ETL | Apache Airflow, Azure, Python (Pandas) | [Slides](#) | [GitHub Code](#)

- Orchestrated a daily ETL pipeline via Apache Airflow (WSL/Ubuntu) integrating custom Open-Meteo API ingestion with automated rate-limiting and retry logic.

Zipplo Rental Operations Data Warehouse | T-SQL, SQL Server | [Slides](#) | [GitHub Code](#)

- Designed a normalized OLTP database and transformed it into a dimensional Data Warehouse (Star Schema) using SQL stored procedures and surrogate key resolution.

Academic Education/Certificates
